<u>Week 2</u> Due 8/24/2017	Lab project Catalogue building	<b>Description</b> Bring in five to seven of your own photographs, import them into Lightroom and build a catalogue with keywords and complete metadata. In Library mode fill out the keyword and metadata templates .	Application Adobe Lightroom	Outcome: Your catalogue should have no fewer than five nor more than seven images, searchable by keywords, and metadata for export. Apply all metadata and key words to all images. Your instructor will visually inspect your work before you leave	
Week 3 Due 8/31/2017	Lab project Toning and exporting files as DNG and creating a collection.	Description Take those same files you prepared in your catalogue last time and now bring them into the Develop module preparing all of them for export	Adobe Lightroom	<b>Outcome:</b> To have your five to seven files significantly changed, to the correct white balance, improved color and clarity and having a correct bell shaped histogram or as close as you can get it on the file. Export those files with individual proper names and individual key words for sorting. Export these files as DNG files with all appropriate metadata. Take three of these files and make a separate collection calling them "finished files" in Lightroom.	
Week 4 Due 9/7/2017	Lab project Organizing files	Description Change files names, create folders and input photographs from an SD card	Application Adobe Bridge and ACR	Outcome: Using 10 new images of yours from previous projects, organize them in Bridge, changing their name using Batch Naming and place three images into a new folder named lab exercise on your	

Week 5 Due 9/13/2017	Lab project Toning in Camera Raw	Description From Photoshop move 3 JPEG files into Adobe Camera Raw and tone the image properly	Application Adobe Bridge & Camera Raw (ACR)	desktop. From your Flash drive input at least three images through Bridge converting them to DNG by using the Open in Camera raw function. Synchronize them and save. Place them in a separate folder, created in Bridge on your desktop. Have all your metadata complete on each image. <b>Outcome:</b> In ACR, use exposure, curves, hue & saturation, sharpening, white balance controls and color controls to significantly change the appearance of 3 images from whatever you have taken this last week. Strive for true colors. Use only ACR controls no PS. Save to your desktop as a TIFF file.
Week 6 Due 9/20/2017	Lab project Tools & Selections	Description Getting familiar with the various tools - specifically the Quick Selection and the Magnetic Lasso Tool	Adobe Photoshop	<b>Outcome:</b> Select two images from a previous assignment. On the first image use the Quick Selection tool on five separate areas of the image, changing the color and tonal range in each area. Make sure you use refine edges to blend the areas back into the picture. On the second image do the same, but use

				the Magnetic
				Lasso Tool.
Week 7	Lab project	Description	Application	Outcome:
Due 9/27/2017	Color Correction	Color correcting	Adobe Photoshop	Out of all the
		your most	*	images you have
		challenging		taken so far this
		photograph.		semester, (must be
				a new shot and
				not something that
				you have done
				before you started
				this course). Find
				the shot that you
				think has the
				biggest challenge
				in color
				correction. Be
				discerning here
				and don't choose
				something easy. I
				will not give you the credit. When
				completed have
				the original and
				what you have
				'fixed' on the
				desktop. Use
				whatever tools
				necessary but be
				consistent in your
				workflow as
				demonstrated.
Week 8	Lab project	<b>Description</b>	<b>Application</b>	Outcome:
Due 10/5/2017	Adjustment layers	Building a fully	Adobe Photoshop	Using one of
		non-destructive		your images from
		workflow		a previous
				assignment.
				Create a fully
				non-destructive
				workflow utilizing the tools of
				selection (lasso & Quick Mask),
				making three
				color balance
				changes, all on
				separate layers
				and two
				hue/saturation

Week 9 Midterm				changes on separate layers. And four levels changes all on separate layers with different selections. You must have a total of at least ten (10) individual layers
Week 10 Due 10/18/2017	Lab project Selecting options	Description To enhance your abilities with selections using quick mask.	Application Adobe Photoshop	<b>Outcome:</b> Chose one of your past images and using the Quick Mask tool (as demonstrated in class) select five forms inside the image, refine the edges so there is a smooth transition of tone, and change the color balance and tonal range of those areas to improve the image. Save to your desktop
Week 11 Due 10/25/2017	Lab project Selections of larger areas	Description	Application Adobe Photoshop	<b>Outcome:</b> Select one image from your panorama. Using Vanishing Point under the filters menu, take a large area of the image, about 1/2, of the image. Change the area selected to mirror the rest of the image using Vanishing Point, as demonstrated in class and

				nothing else. Then rotate the image to look like a true mirror.
Week 12 Due 11/2/2017	Lab project Compositing	Description	Application Adobe Photoshop	Dutcome:Select two of yourpreviously usedimages. Chooseone as yourpalette and aportion of theother you want tocomposite into thefirst. Select aportion from thesecond image,Copy and pastethat into the firstimage. Thenunder layerschoose Convert toSmart Object.Rasterize. Thenclick on the iconin the layer andyou will see anoutlined versionof the imageappear. Work it inPS and then saveit. Changes willthen be rendered.
Week 13 Due 11/8/2017	Lab project Transformations	<u>Description</u> Using transformation to change one images	Application Adobe Photoshop	<b>Outcome:</b> Select and image from a previous assignment that you took. Selection an element inside that images and apply all of the transformation controls to it. That would scale, rotate, skew, distort, perspective and warp.

Week 14 Due 11/15/2017	Lab project Content Aware	Description Using content aware filters and options for larger areas	Adobe Photoshop	<b>Outcome:</b> Using the content aware function, On one of your previous photographs, use the healing brush with content aware and the content aware scale tool to eliminate at least 10 things in one photograph. Keep each elimination on a separate layer so I can evaluate.	
Week 15 Due	Lab project Puppet Warp and the Liquefy filter	Description Retooling images to using puppet warp and liquify filters	Adobe Photoshop	<b>Outcome:</b> Choose one of your previous images and using puppet warp under the edit menu, transform a single subject, (must be a substantial part of the image) into a new shape using puppet warp. Then choose another shape of another object and use the liquefy filter to transform that one. Make sure you copy the background layer so I can inspect the changes you have made.	
Week 16 Due Week 17	Lab project Blending modes	<u>Description</u>	Application Adobe Photoshop	Outcome:	
Final
