Photo 5 online
Project 1
Show me something that makes you laugh

Your goal in this assignment is simple. I want you to take your camera and find things that you think are funny. That you think for some reason are odd, strange or weird. This will take some doing.
Shoot 10 separate (you should shoot more than that) images, of different subjects that make you laugh. Be creative and when you find something figure out how to photograph it in such a way that others will share in the humor you perceive. ***Remember everything must be new – Images from the past are not accepted and trust me I will know!!!!!***

After you have completed the 10 separate images, I want you to select four and separate the best picture into a separate folder labeled Best. The other three go into a second folder labeled others.

PLEASE! – you cannot upload your images from you Iphone or Smartphone. The file names are too long to be processed through an FTP server and your images will be corrupted. You MUST upload from a computer wired to the Internet.

When finished turn into me:
➢ Upload to me at www.thomhalls.com images for the project and place them in your folder. See digital file submission under on the Contact page of my website!
➢ Label one of the images your 'best' like this **(last name_first initial_ best)**
➢ Give three (3) more images labeled **(last name_first initial_others_a,b,c etc.)**
➢ **All images should be in JPEG format – No PNG, GIF, PhotoShop, Raw or Tiff files. DO NOT ATTEMPT TO UPLOAD FROM YOU PHONE!**
➢ If you can size your images, please do so that the longest dimension is **7 inches by 200 dots per inch**.(DPI). If you do not have access to digital editing software, then make sure you camera/phone is set to the JPEG Medium setting for your camera. That should give you a size file that will transmit successfully.
➢ Place these images into the folder with your name on it on the server. To access the folder simply scroll to it, double click and wait for the folder to open.
REMEMBER YOU ARE WORKING OVER THE INTERNET AND DEPENDING ON THE TRAFFIC OT THE SERVER, YOU WILL HAVE TO BE PATIENT. ACTIONS MAY BE DELAYED AS THE COMPUTERS TALK TO EACH OTHER!
