

Story proposal for Photo 47

The most important aspect of choosing a story is what do you want to say or explore? You will find that attacking a story in this way, both in book and video formats; will offer you a variety of methods to communicate.

You need to calculate your time carefully and know that you should be shooting as early as Today!

Please fill in the blank section below with your name and topic by 1/21. Here are some suggested ideas that might spark your imagination. Do not worry if someone else picks the same topic. Your interpretation will be different.

Once you pick a Subject you cannot change it - You must do both the book and video on the same subject, however the direction or the actual story can change from the book to the video or visa versa..
