## Final 2017

Follow these steps

- Download the written Final and the Shooting Final from the website/Canvas.
- Rename the file with your name\_FINAL
- Mark the final with the highlighter in the PDF format.
- Mark the entire answer for each question
- Save the file with your name\_FINAL back to your desktop and then upload it to the server.

1. The four properties of light are direction, form, contrast and context.
  - A. True
  - B. False
  
2. Kodak Brownie Hawkeye cameras were sold by George Eastman at the turn of the century under what company name?
  - A. Kodiak
  - B. Sears & Koduk
  - C. Kodak
  - D. Agfa
  
3. There is an ‘add-on’ that you need to add to this browsers once you down load it. You have to go to the ‘add-on’ page from where you downloaded Firefox. What is the name of this add on?
  - A. FireSTP
  - B. FTPspark
  - C. Fire BTP
  - D. None of the above
  
4. Lewis Hine photographed \_\_\_\_\_ effectively changing laws to protect others from exploitation.
  - A. Child Labor
  - B. American Indians
  - C. Adoption services,
  - D. Civil War
  
5. Which shooting mode places you, the photographer, in full control of the visual situation.
  - A. Program
  - B. Shutter Priority
  - C. Aperture Priority
  - D. Manual

6. Changing the aperture from one number to the next either doubles or halves the amount of light that strikes the film/sensor?
  - A. True
  - B. False
  
7. Back lighting a subject can create a sense of:
  - A. You made a mistake
  - B. Softness
  - C. Definition
  - D. Mystery or drama
  
8. Having cameras present almost everywhere is changing the way society views \_\_\_\_\_.
  - A. Confinement
  - B. Conflict
  - C. Contrast
  - D. All of the above
  
9. Timothy O'Sullivan preceded by 75 years another photographer who photographed much the same area of the great south west. That photographer was?
  - A. Mathew Brady
  - B. Ansel Adams
  - C. Alfred Steiglitz
  - D. Ansel Williams
  
10. A programmable control on a digital camera that is very important to the quality of the image, effecting how the camera reacts to light is called the \_\_\_\_\_.
  - A. White balance
  - B. White obligation
  - C. White quotient.
  - D. White regulation
  
11. A fast shutter speed will stop movement of the subject
  - A. True
  - B. False
  
12. Photographer Diane Arbus used the \_\_\_\_\_ style of documentary photography with her subjects.
  - A. Informational
  - B. Confrontational
  - C. Redundant
  - D. Participatory
  
12. Using Aperture Priority setting is where you set the f/stop and the camera selects the shutter speed?
  - A. True
  - B. False

13. The quality of light refers to the degree of:
- A. Delusion
  - B. Diphtheria
  - C. Diffusion
  - D. Dysfunction
14. When we take our camera out at night we are seeing the world as \_\_\_\_\_ would have us see it?
- A. Nature
  - B. Animals
  - C. Man
  - D. None of the above
15. The pop-up or automatic strobe on your camera produces a 1 to 1 light ratio that is not very flattering. However it can be improved by
- A. Increasing its power
  - B. Diffusing the light with tissue or some type of reflective device
  - C. Never turning the dumb thing on
  - D. Hindering the light by covering it with a totally black cloth
16. Dark tones in a photograph relate to what in our subconscious?
- A. Aloneness and isolation
  - B. Contrast
  - C. Lighthearted and connectivity
  - D. None of the above
17. The depth of field is the area of sharpness  $\frac{2}{3}$  in front of the subject and  $\frac{1}{3}$ 's in back of the subject.
- A. True
  - B. False
18. Most digital cameras default on what metering system
- A. Mitigated
  - B. Center weighted
  - C. Partial
  - D. Spot
19. Your light meter reads the brightness of \_\_\_\_\_.
- A. Contrast
  - B. Darkness
  - C. f/stops
  - D. Light

20. The Rule of Thirds allows us to analyze the placement of compositional objects and \_\_\_\_\_ those objects.
- A. Organize
  - B. Replicate
  - C. Distort
  - D. Challenge
21. The first person to “discover” photography was a man by the name of:
- A. Kodak
  - B. Daguerre
  - C. Neipce
  - D. Eastman
22. The proper exposure of any image is based on the aperture and shutter speed working in \_\_\_\_\_ to create a good file.
- A. Separately.
  - B. Concert together.
  - C. Reaction to each other.
  - D. None of the above.
23. Each shutter speed under 1 second is marked as the denominator of the fraction of a second that the shutter remains closed.
- A. True
  - B. False
24. Persuasive photography finds its biggest audience in what market?
- A. Fine Art
  - B. Editorial
  - C. Advertising
  - D. None of the above
25. When viewing a photograph our eye goes from a darker area of the picture the lighter area?
- A. True
  - B. False
26. Bouncing light creates an \_\_\_\_\_-like effect that softens the light
- A. Covering
  - B. Umbrella
  - C. Direct
  - D. Backlit
27. Photographer Diane Arbus shot documentary images of unusual people and herself spent time in a mental health clinic?
- A. True
  - B. False

28. TTL stands for
- A. Tender Tonal Luminosity
  - B. Through the Lentile
  - C. Through the Lens
  - D. Through the Luminosity
29. Meters in cameras can see color
- A. True
  - B. False
30. Mathew Brady is famous for his photographs of?
- A. World exposition in Paris is 1898
  - B. The Civil War
  - C. The French American War
  - D. New York society
31. ISO stands for:
- A. International Shooters Organization
  - B. International Systems Operation
  - C. International Silver Optimization
  - D. International Standards Organization
32. Your camera will always default on (until you reset it) the Color Space sRGB. Why?
- A. Because of the larger color gamut abilities
  - B. Higher Contrast
  - C. Lower Contrast
  - D. Because digital cameras only have one Color Space.
33. What is the name of the very first viewing technique used by man?
- A. Camera Obtusecura
  - B. Camera Obscura
  - C. Robustia de Camera
  - D. Camera Proscura
34. A light sensing chip used in digital cameras today is either a
- A. CCE or CMOU
  - B. CCMU or a CDC
  - C. CMUC or a DCC
  - D. CCD or CMOS
35. A Histogram is a?
- A. Disease you should see a Doctor about.
  - B. A graphic representation of the tones in your image
  - C. A white balance selection tool
  - D. A graphic representation of image composition.

36. Pixels collect light and utilize small filters dividing the light into \_\_\_\_\_, \_\_\_\_\_, and Blue combinations
- A. Red and Cyan
  - B. Red and Yellow
  - C. Red and Brown
  - D. Red and Green
37. Changing the resolution on your camera will not affect how many images will fit on your media card?
- A. True
  - B. False
38. The trick in determining whether an image is documentary in nature of persuasive is to understand when you are being
- A. Confronted with the truth or being manipulated to change your behavior.
  - B. Confronted with the truth or being told to do whatever you want.
  - C. Confronted with a visual lie and manipulated spread that visual lie.
  - D. Confronted with a truth and manipulated to think it is a lie.
39. When you overexpose an image, what result will you see on your cameras LCD screen?
- A. A darker image
  - B. A perfectly exposed image
  - C. A lighter image
  - D. A reversed image
40. Your EV settings on your camera have the same effect as changing your \_\_\_\_\_ and \_\_\_\_\_.
- A. ISO and DOF
  - B. Shutter speeds and aperture
  - C. Shutter speeds and WB
  - D. DOF and WB
41. What we all must remember about instant-reportage' on social media is the \_\_\_\_\_ of the viewer.
- A. Proficiency
  - B. Prognosis
  - C. Perspective
  - D. Prognostication
42. Persuasive photography as contrasted with Documentary Photography tries to
- A. Show reality as how you wish it to be.
  - B. Alter the way you think about reality
  - C. Alter the way you see all images
  - D. Show reality in a stark confrontational style
43. A telephoto lens is excellent for portraiture?
- A. True
  - B. False

44. Photographic stories many times will dispel our \_\_\_\_\_ of other cultures
- A. Bias
  - B. Indifference
  - C. Stereotypes
  - D. None of the above
46. Which lens on a 35mm DSLR camera approximates what the human eye sees?
- A. 35mm
  - B. 50mm
  - C. 85mm
  - D. 100mm
47. The 'magic 15 minutes of light' near dawn and at sunset are due to:
- A. The atmosphere's build up of ultraviolet rays
  - B. The sun's extreme angle to the earth causing deep shadows
  - C. The lowering of the electromagnetic spectrum during these hours
  - D. None of the above.
48. Ambient light is light coming from an indirect light source
- A. True
  - B. False
49. The words aperture and f/stop are different words for very different functions?
- A. True
  - B. False
50. Overcast days are not good for shooting portraits because of the diffused nature of the light.
- A. True
  - B. False
